

ABSTRACT OF THE DISCLOSURE

A communication device is provided. The communication device comprises a keyboard used to input literal information. In the communication device, a

5 character allocated to each of keys provided on the keyboard can be changed. In the communication device, the character may be allocated to each of the keys according to a predetermined keyboard character layout. In the communication device, the predetermined keyboard

10 character layout may be selected from among a plurality of predetermined keyboard character layouts by a user.
